

DAE Pumps Accessory Range

➔ Dredge hoses

➔ Pipe floats and hose floats

➔ Ultrasonic flow meters

➔ Hydraulic power units

➔ Variable frequency drives

➔ Generators

Why Choose Us

DAE Pumps delivers dependable, efficient pumping solutions for industries that handle abrasive, viscous, and high-solids materials. Our mission is to provide high-quality products that support maximum uptime, stronger flow performance, and long-term durability.

Our Value

- ✓ Engineered for harsh environments
- ✓ Wide product coverage across both water and solids handling
- ✓ Multiple pump types to match any application
- ✓ Solid support through selection, operation, and maintenance

 **DAE Pumps**
DESIGNED AND ENGINEERED PUMPING SOLUTIONS

**INDUSTRIAL PUMPS
&
DREDGING SOLUTIONS**

DREDGE PUMPS

- ➔ **Excavator-Mounted Dredge Pump**
Transforms an excavator into a powerful dredging tool for ponds, lagoons, and rivers.
- ➔ **Cable Deployed Dredge Pump**
Suspended pumping for deep or hard-to-reach locations.
- ➔ **Pontoon Dredge Pumps**
Floating systems are ideal for dredging in lakes, canals, and industrial basins.
- ➔ **Diver Operated Pumps**
Underwater operated units for precise sludge and sediment removal.

FLOODED SUCTION PUMPS

- ➔ **Horizontal Flooded Suction Pumps**
Reliable flow for process water, industrial fluid circulation, and slurry movement.
- ➔ **Vertical Flooded Suction Pumps**
Space-saving configuration suited for pits, sumps, tanks, and industrial basements.

SUBMERSIBLE PUMPS

- ➔ **3 to 16-inch pumps**
Compact, high-performing units built to handle demanding dewatering and slurry applications with consistent output across varied depths and flow conditions.

SELF-PRIMING PUMPS

- ➔ **Appalachian Series**
Durable, field-proven pumps for handling liquids with solids, ideal for construction and general industrial transfer.
