La Paz 3D-TM

La Paz 3D-TM is designed for tank cleaning where portability in confined space entry is difficult. Process tanks, frac tanks, and barges all contain abrasive solids that the Fast Flow Pumps are specifically designed to handle.

Two efficient hydraulic gear motors are self-lubricated and specifically engineered to keep contaminants out. There are absolutely no mechanical seals, no wear plates and no shaft bearings. Handles low level cavitation without damage.

Truly run dry technology

The only submersible pump with no mechanical seals, no wear plates, no internal friction and no shaft bearings.
